Senior Solution Architect
Code: SSA 001
Location: Athens

At **WIND**, we believe in a world of connection, interaction and sharing!

Our passion is that people enrich their lives with all that communications technology makes possible.

We want our Customers to focus only on expressing themselves, while we take care of the technology that enables them.

So, if you want to take part in changing how people experience their lives, WIND is the right place to be.

Start today, as a **Senior Solution Architect** and become part of an enthusiastic team who work at the very edge of technology.

Main Tasks:

- Contribute to the overall IT/IS digital architecture transformation

- Own the data & info architecture:

    - System of Records information architecture - Data mastership assessment and transformation

    - Data analytics & insights architecture

- Assess database implementation & architecture and shape the data management and governance policies and strategy

- Oversee the migration of data from legacy systems to new solutions.

- Design state of the art monitoring integrated solutions for digital products and systems

- Recommend solutions to improve new and existing database systems.

- Contribute to the Cloud strategy and architecture with particular focus on Data strategy and services on Cloud

- Guide the Analytics and Insights team and collaborate in terms of vision, architecture, and on-going technical evolution of their systems

- Contribute to the Enterprise Architecture operations and activities

Basic Requirements:

- Ability to drive complex Solution Architecture engagements at a detailed level across a broad range of domains/functions

- Having a track record within several large-scale IT programs, taking ownership of the Architecture and Design activities and outputs

- Have experience in seeking the alignment of business and IT, operating across organizational and technology teams to drive common approaches, delivering sustainable, agile and re-usable solutions

- Understanding of Agile ways of working and patterns

- Experience in dealing with data intensive solutions and architecture

- Ideally experience with Data Analytics and/or Data Warehouse services

- Experience with Cloud services/platforms/technologies

Join our team and:
- Be part of a fast-growing company, and one of the biggest in Greece
- Work with passionate professionals, who excel in their fields
- Learn in a challenging and friendly working environment
- Create your career path in dynamic organization
- Enjoy competitive salary, private health insurance & special offers
- Share your hobbies, take part in more than 10 εuWIND activities (athletic & cultural)
